Frames/Snap Lock System:

5 year guarantee against frame and tab snap system, not theft.

Modular Frame system that coordinates with vandal resistant sign as above.

Damaged sign should be removed from wall and sent to our corporate headquarters for verification of color and copy, a new sign will be made with-in 4-6 working days for all standard colors, 2-3 weeks for custom colors.

Non ADA Compliant/2-Ply Engraveables

5 year guarantee against defects, not theft or scratching

4Signsolutions guarantees professional installers, our installer 'Lambros Signs' has been installing and maintenancing signs for 18 years

Installation

It is advisable to have installer add liquid nails to backing of all signs; our signs include a vinyl foam tape adhesive.

Our installers will always use liquid nails or screw signs with anchors to the wall

Maintenance

Plastic signage may be wiped with warm soapy water or a light non abrasive cleaner, such as 'Fantastic'. Metal signage, i.e. cast letters, cast plaques; metal signs should only be cleaned with warm soapy water. 4Signsolutions can provide a cleanser for the metal lines. The metal lines that are a polished or mirror finish and that do not have clear coating must be polished, i.e. mirror finish brass signs or letters. Any brass polishing kit will ensure a continual shine.

Exterior 'post and panel' type signs with painted or baked enamel finishes should be polished with a simple car wax on a yearly basis to ensure the rich luster/shine.
